

PolyAgboard®

The perfect edge to protect your product line

- Exceptionally strong
- Waterproof
- Reusable and recyclable
- 100% Plastic

PolyAgboard® cornerposts, made from a high density polyethylene, provide added protection for loads during shipping and handling. Its high strength characteristics tolerate higher strapping tensions, allowing for a tighter, more unitized pallet. Combined, these characteristics help ensure that your pallets arrive at their destinations in excellent condition, eliminating rejection rates and ensuring high customer satisfaction.

PolyAgboard is stronger yet lighter weight than other cornerpost products, enabling more cornerposts per truckload which can significantly reduce your freight costs.

100% Recyclable

Angleboard products are made from 100% recycled materials.
